

Smart City Solutions

Smart Technology and Infrastructure: How are They Changing Cities?

MML Capitol Conference 2018

March 21, 2018

Gina Schrader
Director, Business Model Innovation

is an innovation center
accelerating advanced energy and
mobility technologies that transform
how we use energy to improve the
way we **live** and **move**.

What we do

help small companies grow

- Since 2002, we have worked with over **400 companies**, major universities, federal agencies, and philanthropic organizations to attract over **\$1.5 billion** in advanced energy and mobility technology investments.
- We are best in class among State of Michigan and national incubators
- Between 2011-2016, 95 unique small company clients reported:

Secured nearly \$500 million
in new funding and business

2,100 jobs created or retained

600% increase in jobs

705 patents, copyrights,
trademarks filed

What we do

accelerate innovative solutions via public-private partnerships

private

public

NextChallenge: Smart Cities

overview

NextChallenge addresses challenges facing urban areas by accelerating the development of hardware and software smart city solutions that are connected, interactive & data driven
