A.I. - WHAT IS IT?

1956- Founded as an academic discipline (56 years)

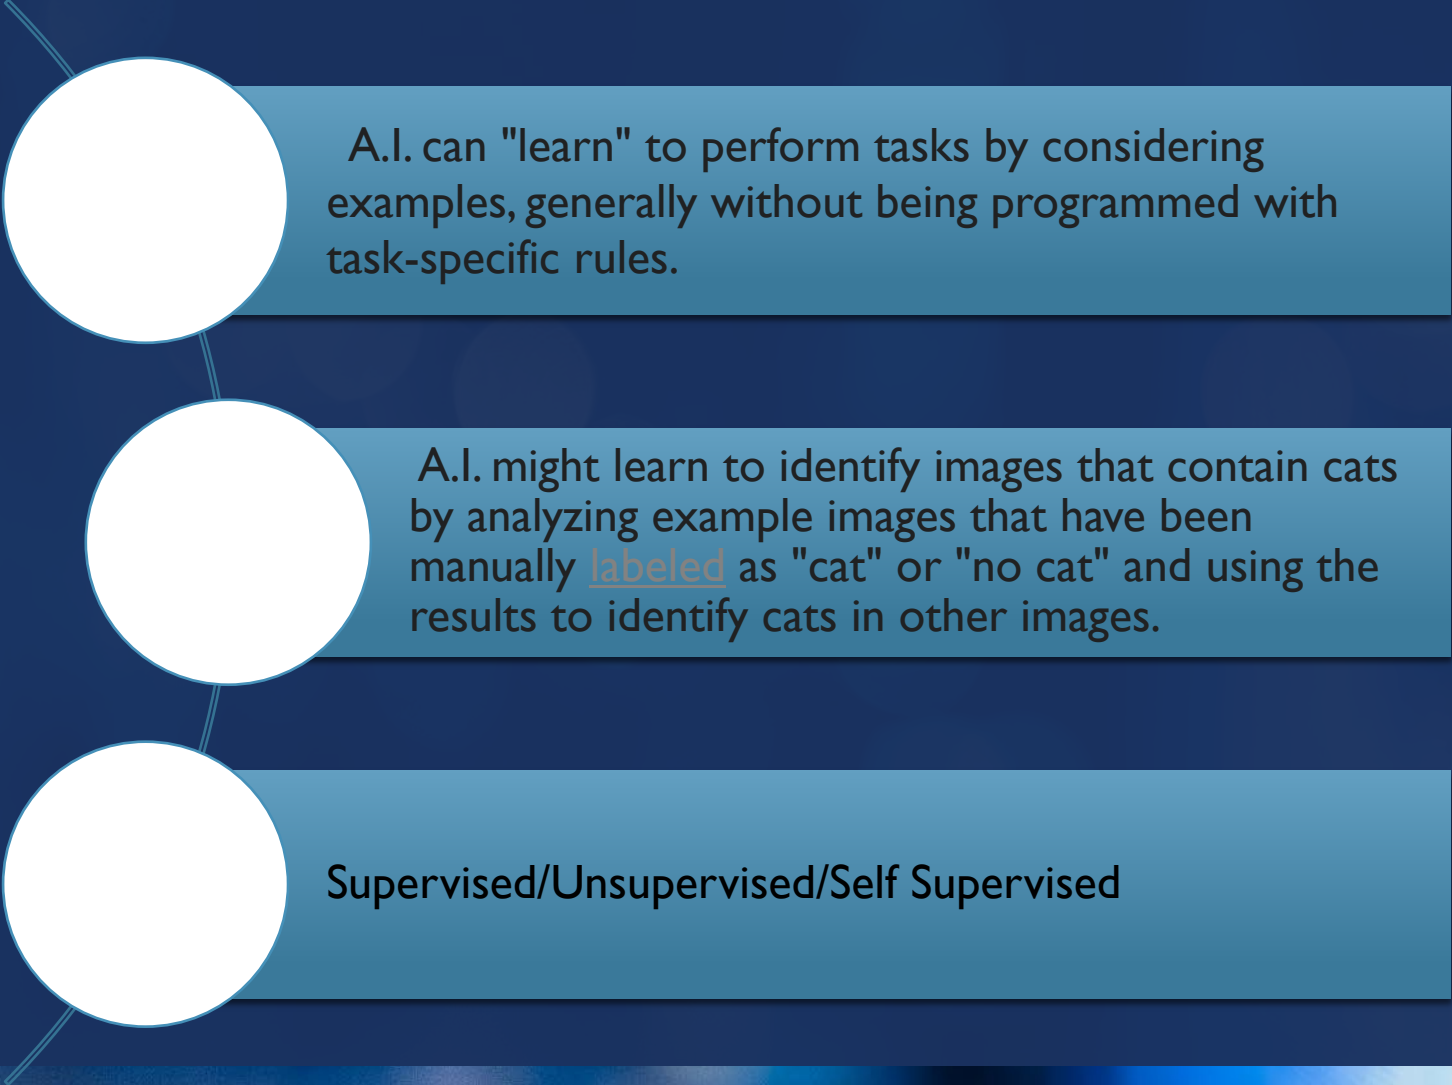

Deep Learning/Deeper Learning- Fully automatic learning from a source to a final learned object.

Neural Networks- "learn" to perform tasks by considering examples, generally without being programmed with task-specific rules.

A.I. - WHAT IS IT?

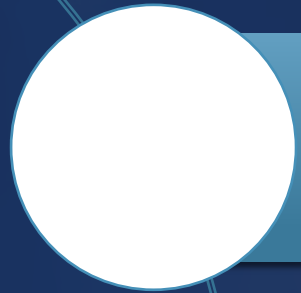

A.I. can "learn" to perform tasks by considering examples, generally without being programmed with task-specific rules.

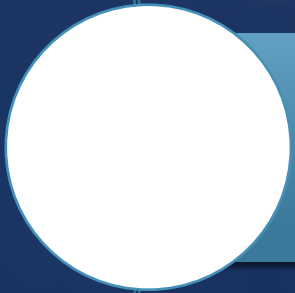

A.I. might learn to identify images that contain cats by analyzing example images that have been manually **labeled** as "cat" or "no cat" and using the results to identify cats in other images.

ARTificial Intelligence

Featuring 4 local creatives from different artistic backgrounds
&
Introducing interpretations generated with
MidJourney BeCasso Adobe Photoshop

A stylized illustration of two female figures with glowing, circuit-like bodies and heads. They are standing next to a computer monitor on a tripod stand. The monitor displays the text 'ARTificial Intelligence Downtown Flint 5/12/2023'. The background is a light green color with faint circuit patterns.

ARTificial Intelligence will be exhibiting in multiple locations in
Downtown Flint in partnership with Flint Art Walk from 6pm-9pm
